

June 6, 2011

Dear Parent/Guardian,

This summer, the High School Math Department is recommending that students entering Algebra and Geometry should complete the following summer work. This is completely optional, but is strongly recommended for retaining and strengthening their math skills. It is expected that students know how to complete these problems for their upcoming math course. If you have any questions please feel free to email me at rspence@rockets.sparcc.org. Have a great summer!

Ryan Spence
